Summary

Organized, **reliable**, and **motivated Full Stack Web Developer** with over **2 years of experience** in building robust web applications and teaching web development. Proficient in **Ruby**, **PHP**, and **JavaScript**, with hands-on expertise in databases such as **PostgreSQL**, **SQL**, and **MySQL**. Adept at delivering scalable solutions and collaborating effectively within teams to drive project success. Known for **adaptability**, **strong communication skills**, and a proven **ability to learn quickly**, I look forward to applying my expertise to tackle new challenges ahead.

Skills

Back End - Ruby (Ruby on Rails), PHP (CodeIgniter / Laraval), Python (Django), REST API, Apache

Front End - JavaScript, React.js, Vue.js, Stimulus.js, Bootstrap, HTML, CSS, Adobe

Databases - SQL, MySQL, PostgreSQL, MariaDB

Development Tools - Git, GitHub, Backlog (Version Management), Docker, Kubernetes, AWS, Heroku

Languages - English (*Native*), Japanese (*JLPT N3 Certified*)

Experience

Full Stack Web Developer
株式会社 創告 Sokoku Inc.   9/23 - Present

- Led the design, development, and maintenance of multiple in-house applications, ensuring seamless functionality and usability.
- Revamped and optimized existing web applications, improving code readability, **reducing load times by 20%**, and **enhancing overall performance**.
- Implemented innovative features that **drove web traffic to over 90,000 monthly visits**, significantly boosting user engagement.
- Spearheaded and streamlined deployment processes across various projects, ensuring timely and error-free releases.

Programming Lecturer / TA
Le Wagon   9/22 - Present

- Delivered engaging, interactive lectures and live coding challenges, facilitating student participation and mastery of Ruby and Ruby on Rails.
- Simplified complex programming concepts, **ensuring clarity and accessibility** for learners of varying skill levels.
- Mentored students in developing their first applications, demonstrating **leadership** and **management skills** throughout the process.

Software Engineer
Mamoru   12/22 - 9/23

- Designed and implemented new features and resolved critical bugs, **enhancing user experience** and functionality.
- Collaborated with multiple teams to **optimize** applications, **improving performance** and **user engagement**.

Education

Full Stack Web Development
Le Wagon

- 24-week part-time intensive coding bootcamp.

BA Hons Journalism & Psychology
City University, UK

Voluntary Positions

Event Host/Co-ordinator
Futsal Tokyo   2020 - 2024

- Organized and hosted events to foster an inviting and inclusive atmosphere for an international community, contributing to its growth to nearly 9,000 members.
